

Buy-a-Cell

The University of Michigan Solar Car Team is one of the largest, most prestigious, and well-respected student organizations at the University of Michigan. Over the past twenty years, the team has distinguished itself as the most successful solar car team in North America by winning five out of nine North American Solar Challenges. The success that the team has had is only possible because of the unprecedented support that the team has received from many individuals.

We would like to invite you to join the Michigan tradition of excellence by purchasing a solar cell for Infinium's solar array. Each of the 3,000 solar cells gives Infinium more power, strengthening our chances of winning the World Solar Challenge in October, 2009. If we win, we will be the first American team to win the world title since GM won the inaugural race in 1987.

We hope that you will buy a solar cell and help the University of Michigan Solar Car Team surpass our own standards of excellence.
